MASTERstylist150

General Data

Machine drawing	MASTERstylist150, Brushing machine
Finish	RAL 7035, RAL 7016, RAL 3020
Total weight	2.900 kg

Technical Specifications

Length/width/height	4400/2400/3200 mm
Board format – length/width	1400/1100 mm
Product height	max. 400 mm
y-axis travel	2650 mm
y-axis drive power	3.0 kW
z-axis travel	1000 mm
z-axis drive power	3.0 kW
Cycle time	approx. 14.0 sec.
Brush length	1500 mm
Brush diameter	max. 300 mm
Brush speed	max. 900 rpm
Number of brushes	2
Brush drive power	2 x 3.0 kW
Controller	Siemens S7/300
Total drive power	12 kW
Connected voltage	400 V

General mode of functioning

The MASTERstylist150 is a “standalone” machine that integrates into almost any existing system. The MASTERstylist150 is installed in the fresh concrete area and works synchronously with the production machine.

Two separate structured brushes work at right angles to the direction of transport and guarantee unique brushing patterns. Custom brushing programs can be stored in a recipe database for instant retrieval.
